- .1. Manuals
- .2. Quick reference and troubleshooting

1. Getting started — logging in and roles

The Admin Console is at `https://kutumb.org.au/admin` . You can also reach it from the **Admin** link in the website footer (under *Get Involved*).

- 1 Enter your admin **Email** and **Password**.
- 2 To check what you typed, click the **eye icon** at the right of the password box. Click it again to hide the password.
- 3 Click **Login**. You stay logged in on that browser until you click **Logout** (top right of the console) or the session expires after 12 hours.

Figure 1 — Admin login. Left: password hidden. Right: after clicking the eye icon, the password is shown.

Use the eye icon in private

Only reveal your password when nobody can see your screen. Always log out on shared computers.

Admin roles

Role	Can access
Super Admin (full access)	Everything: Members, Bank, Events Settings, Events Management, Data Management (including Database Tables) and Key Settings & Access.
Admin (limited access)	Events Settings, Events Management and File Management only. No Members, Database Tables, API Keys or Settings.

Super Admins create and remove admin logins under **Key Settings & Access → Admin Users** (section 10).

2. The console at a glance

Figure 2 — The Admin Console after logging in. The main tabs run across the top of the working area.

Main tab	What it is for
Members	The member register: search, filter, edit, email and export members.
Bank	The Kutumb NAB account: live balance, transactions by event and period, and PDF reports.
Events Settings	<i>Upcoming Events</i> (what appears on the Events page, with fees and capacity) and <i>Past Events</i> (photo and video archive).
Events Management	<i>Event Registration</i> , <i>Ticketing & Payments</i> , <i>Coupons</i> and <i>QR Check-in</i> .
Data Management	<i>Database Tables</i> (direct record editing) and <i>File Management</i> .
Key Settings & Access	<i>API Keys</i> , <i>Settings</i> (payment methods, automatic emails), <i>Admin Users</i> and the <i>Audit Log</i> .
Manuals	Read or download this manual and the Membership & Event Booking Guide.

Figure 3 — Members tab: total members, interest filter, sortable table and bulk actions.

- **Search and filter.** Type in the search box to find a member by name, email, phone or membership number. Use **All interests** to show only members interested in, for example, Yoga & Wellness.
- **Sort.** Click a column heading (Membership No, Name, Email, Phone, Address) to sort by it. Click again to reverse the order.
- **Edit.** Tick one or more rows, then click **Modify Selected** to change their details.
- **Email members.** Tick the members you want (or none, to email everyone currently shown), then click ✉ **Send Email**. An AI-assisted draft option is available if a Groq key is set up (section 10).
- **Export.** **Download CSV** saves the list shown for use in Excel.
- **Import.** 📄 **Import from members.json** is a one-off tool for loading members from the old file-based system. You won't normally need it.

New members join themselves through the website's Membership page. They get a membership number and a PDF membership card by email automatically, so there is nothing to do here for a normal sign-up.

4. Bank

Members **Bank** Events Settings Events Management Data Management Key Settings & Access

Kutumb Australia Inc · NAB BSB 082-356 · 778280517
Live NAB feed not connected (Admin → Key Settings & Access → API Keys)

Add Event

Figure 5 — Upcoming Events: the editable events table (top) and the Add New Upcoming Event form (below).

Each row is an event on the website's Events page. Edit the cells directly, then click that row's **Save**.

Field	Meaning
Active	Tick to show the event on the website and allow registrations.
Title, Date, Time, Location, Description	Shown to the public. Give the date as a specific day , for example <i>October 24, 2026</i> . A month-only date such as <i>October, 2026</i> works on the website, but automatic reminders and cancellations are skipped for it.
Capacity	Total places. The website shows " <i>N / capacity spots available</i> ".
Member Fee / Non-Member Fee	Price per adult. Set both to 0 for a free event (no payment step).
Under-5 Free, Child Member / Non-Member Fee	Tick <i>Under-5 Free</i> so children under 5 register free. A child fee applies to children 5 and over. Leave it blank to charge them the adult rate.
Flyer	An image shown on the event card.

To add an event, fill in **Add New Upcoming Event** and click **Add Event**. **Delete** removes an event. Once an event's date has passed, it is automatically archived to Past Events.

5.2 Past Events

The screenshot displays the 'Past Events Management' section of the Kutumb Admin Console. At the top, there are navigation tabs: Members, Bank, Events Settings (active), Events Management, Data Management, and Key Settings & Access. Below these, there are sub-tabs for 'Upcoming Events' and 'Past Events'. The 'Past Events' tab is selected, showing a list of 9 events. Two events are visible:

- Utsav Multicultural Festival 2026** (September 20, 2026):
 - Description:** Celebrating unity in diversity by showcasing the rich cultures of Australia through Indian Cultural Performances, Music, Dances, Family Entertainment and many more.
 - Highlights:** (Empty text area)
 - Photos & Videos:** Includes a flyer image and a '+ Add photo/video' button.
- International Yoga Day** (June 21, 2026):
 - Description:** Join us on this special day of yoga to know benefits and impact of it in our mental and physical well being
 - Highlights:** (Empty text area)

Figure 6 — Past Events: description, highlights and media for each archived event.

Edit the **Description** and **Highlights**, then click **Save Text**. Use **+ Add photo/video** to upload media, and **x** to remove one. They appear under Events → Past Events.

Figure 7 — Event Registration for one event: action buttons, filters and the registrations table.

- 1 Choose the event in **Select Event**. If a new event is missing from the list, click **Reload Events**.
- 2 Review the table. Each row shows the registration number (e.g. DMC26-R0001), contact details, number of adults and children, fee, payment status, amount paid, date paid, transaction number and membership number.

- 3 Use the search box and status filter to narrow the list. Click headings to sort.

Button	What it does
Modify Selected	Edit ticked registrations, for example to correct a name, record a payment by hand, or mark a registration as Paid. Marking as Paid confirms it and emails the tickets.
 Send Email	Email the ticked registrants, or everyone shown.
 Upload Bank Statement	Import a NAB statement (CSV/Excel). Credits are matched to registrations by registration number, membership number or name. Matches covering the fee (or the balance after a coupon) become Paid and tickets are emailed.
 Export Filtered (Excel)	Download exactly the rows shown (or the ticked rows) as a formatted Excel file.
Download CSV	Plain CSV of the registrations.
 Attendees	Show each individual attendee's name, QR ticket and check-in status.

Registration and payment statuses

Status	Meaning
Pending / pending payment	Registered, place reserved, fee not fully paid yet. This includes coupon part-payments waiting for the balance.
Paid / confirmed	Fully paid (card, PayPal, Square, verified bank transfer, coupon, or a mix). QR tickets have been emailed.
Cancelled	Cancelled by an admin or automatically for non-payment (section 8). The places are released.

6.2 Ticketing & Payments

The screenshot shows the 'Events Management' section of the Kutumb Admin Console, specifically the 'Ticketing & Payments' tab. The interface includes a top navigation bar with links to 'Members', 'Bank', 'Events Settings', 'Events Management' (active), 'Data Management', and 'Key Settings & Access'. Below this is a sub-navigation bar with 'Event Registration', 'Ticketing & Payments' (active), 'Coupons', and 'QR Check-in'. The main content area is divided into three sections: 1. 'Event' section: A dropdown menu shows 'Diwali and Multi Cultural Event'. Below it, a text input field also contains 'Diwali and Multi Cultural Event'. 2. 'Ticket types' section: A header shows '0 / 300 seats allocated · 300 not yet assigned to a ticket type'. Below this, a form allows adding new ticket types with fields for 'Name' (e.g., General), 'Price (\$)' (0), and 'Total seats (300 left)' (300). A blue 'Add ticket type' button is present. 3. 'Orders (0)' and 'Waitlist (0)' sections: Both sections show a count of zero. The 'Orders' section has a table header with columns 'Buyer', 'Status', and 'Total'. The 'Waitlist' section has a message 'No one on the waitlist.'

Figure 8 — Ticketing & Payments: ticket types, orders and waitlist for an event.

For events sold as tickets rather than registrations, create **Ticket types** (name, price, number of seats) with **Add ticket type**. **Orders** and the **Waitlist** for the event are listed underneath.

6.3 Coupons

Coupons are event-specific, single-use codes (for example `KUT-0546D8`) worth a fixed dollar amount. A registrant enters the code at payment. If it covers the whole fee, the registration is confirmed at once. If it covers only part, the **balance is calculated automatically** and paid by card or bank transfer (section 7).

Figure 9 — Coupons: the Generate Coupons form (top) and the event's coupon list with QR codes and actions.

Creating coupons

- 1 Choose the event in **Select Event**.
- 2 Enter the **Coupon Amount (\$)** and **How many coupons?** (1–100).
- 3 Optionally enter **Recipient Name**, **Recipient Email**, **Valid Until** and **Notes / Conditions**.
- 4 Click **Generate Coupon(s)**.

Coupons are emailed automatically

If you enter a **Recipient Email**, that address automatically receives an email with the coupon code(s), value, event, validity dates, notes, QR code and instructions. A batch of several coupons arrives as **one** email. A message confirms "...and emailed the details to ...". If sending fails, a red message says so. The coupons are still created, and you can resend later.

Figure 10 — The email a coupon recipient receives.

Managing coupons

Action	Use
 Email	Re-send a coupon to its recipient email (shown only when the coupon has one).
Edit	Change recipient, email, expiry or notes at any time. The amount can only be changed while the coupon is still <i>Active</i> (unused).
Void	Make an unused coupon unusable, while keeping the record.
Delete / Delete Selected	Permanently remove coupon records (for mistakes or test coupons). A registration that already used a deleted coupon keeps its discount.

Divya Chopra (divya.chopra@example.com)	Registrant	—	Check in

Figure 12 — QR Check-in: scan with the camera or check people in from the attendee list.

Choose the event, then either click **Scan with Camera** and hold each ticket's QR code to the camera, or find the person in **Attendees** and click **Check in**. A ticket can only be checked in once. A second scan shows a warning.

At the door with a phone

Volunteers use the simple phone page at kutumb.org.au/checkin. It is also linked as **Check-in** under Events in the website footer's Quick Links. The installable app version is at [/checkin-app](https://kutumb.org.au/checkin-app).

- 1 Open the page. The **email box is already filled in** with info@kutumb.org.au.
- 2 Type the password. Tap the **eye icon** to check it, then tap **Sign in**. The phone can save the password for next time.
- 3 Allow camera access and point the camera at each ticket. A large green banner means checked in, amber means already checked in, and red means an invalid ticket.

Figure 13 — Phone check-in login with the email pre-filled. Right: password revealed with the eye icon.

The password is never pre-filled

Only the user id is built into the page. The password must be typed (or saved by the phone's browser). This keeps it out of the website code, where anyone could read it.

7. How payments work

After registering for a paid event, the registrant sees a payment screen. The same screen is reached from the **Pay Now** link in their emails. The payment methods offered are the ones ticked in **Key Settings & Access → Settings → Payment Methods**.

Method	What happens
Card (Stripe / Square), PayPal	Paid in a secure popup. The registration becomes Paid/confirmed and tickets are emailed immediately.
Bank transfer	The registrant transfers using their registration number as the reference. It stays <i>Pending</i> until the bank credit is matched, automatically from the NAB feed or statement, or by an admin. It then becomes Paid and tickets are sent.
Coupon — full	The coupon covers the fee. Confirmed at once.
Coupon — part payment	See below.

Part payment by coupon

✕

📄

Complete Payment to Confirm

Your spot for **Diwali and Multi Cultural Event** — October 24, 2026 is reserved as **DMC26-R0011**, but it isn't confirmed yet — pay the amount below to finish registering.

Registration Number: DMC26-R0011

Membership Number: 260002

Adults: 2 (including you)

Children: 2

Fee: \$50 (\$20 × 4) — **payment required**

Pay below to finish now — or if you leave this page before paying, we'll email a payment link to ananya.pillai75@example.com.

📄

Thank you — coupon part payment received

Amount due

\$50.00

Paid by coupon

— \$20.00

Balance to pay

\$30.00

Please pay the balance below by card or bank transfer to confirm your booking. If you leave now, we'll email you a link to pay the balance later — but unpaid registrations are cancelled before the event and the coupon payment then lapses.

Have an event coupon?

e.g. KUT-7F3QK2

Apply

🇺🇸

Pay \$30.00 by Card

Figure 14 — What the registrant sees after a \$20 coupon on a \$50 fee: the balance of \$30 is worked out automatically and shown on every payment button and in the bank details.

- 1 The coupon is applied and marked *Used* immediately. The registration shows the coupon amount as paid and stays **Pending**.
- 2 The registrant pays the **balance** by card or bank transfer. A bank transfer for exactly the balance is recognised and matched automatically, and the registration becomes Paid.
- 3 If they **leave without paying the balance**, they receive one "Thank you for your part payment — *balance due*" email (after 30 minutes by default) with a Pay Now button and bank details.
- 4 If the balance is still unpaid, they receive the normal reminders. The **final reminder warns that the coupon payment will lapse**. If the event has auto-cancel ticked, the registration is then cancelled, and the coupon lapses (it is single-use and not refunded).

Figure 15 — Left: thank-you and balance-due email. Right: final reminder with the coupon-lapse warning.

Real money is never lapsed automatically

If a registration has card, bank, PayPal or Square money on it (even with a coupon too), it is **not** auto-cancelled. It is listed for an admin to review instead.

8. Automatic registration emails, reminders and cancellation

The website checks every 10 minutes and sends these automatically (Sydney time):

Email / action	When
Coupon part-payment thank-you	Once, 30 minutes (configurable) after a coupon part payment if the balance is still unpaid.
Payment reminder	On reminder days (default Mon and Thu, 10:00) to unpaid registrations, while the event is more than 6 days away. Not sent within 24 hours of registering.
Final reminder	6 days before the event. It gives the cancellation date if the event auto-cancels, and the coupon-lapse warning for coupon part-payments.
Auto-cancel	5 days before the event, for events with <i>Auto-cancel unpaid</i> ticked: unpaid and coupon-only part-paid registrations. Bank credits are checked once more first. The registrant is emailed and the admin mailbox gets a summary.
Welcome	The day before the event, to every confirmed registration, with QR tickets attached.

Figure 16 — Cancellation email for a coupon part-payment, confirming the coupon payment has lapsed.

Never auto-cancelled (emailed to the admin mailbox for review instead): part-payments with real money, people who said they paid by bank transfer that isn't matched yet (unless that setting is on), and anyone who registered in the final week.

Automatic Registration Emails

☒ Payment reminders (twice weekly + final reminder) — on for ticked events
 ☒ Auto-cancel unpaid registrations — on for ticked events
 ☒ Day-before welcome email — on for ticked events

Payment reminder days (e.g. mon,thu)

Send at hour (0-23, Sydney time)

Final reminder — days before event

Cancel unpaid — days before event

☒ Coupon part payment — email a thank-you + balance-due request if the registrant leaves without paying the balance

Coupon part payment — minutes to wait before sending that email (5-1440)

☒ Email the coupon code & details to the email entered when a coupon is created
 ☐ Also auto-cancel people who said they paid by bank transfer but it isn't matched yet

- **Payment reminders** every Mon & Thu at 10:00 (Sydney) — only to registrations still awaiting payment, paid events only.
- **Final reminder** 6 days before the event. For events ticked for auto-cancel it gives the cancellation date, and **unpaid registrations are cancelled** 5 days before (spots released, registrant emailed, admin mailbox told).
- Part-paid only by **coupon**: treated like unpaid — thanked and asked for the balance ~30 min after applying the coupon, reminded, warned in the final reminder that the coupon payment will lapse, then cancelled (coupon lapses).
- Never auto-cancelled (listed for you instead): part-payments with card / bank / PayPal / Square money, people who said they paid by bank transfer that isn't matched yet, and anyone who registered in the final week.
- **Welcome email** the day before the event to every confirmed registration (free and paid), with their QR tickets attached again.
- Events whose date has no specific day (e.g. "November, 2026") are skipped.

Which events

An email goes out only when both the switch above and the event's tick here are on. New events start with reminders and welcome ticked, and auto-cancel unticked.

Event	Registrations	Payment reminders	Auto-cancel unpaid	Welcome email
Diwali and Multi Cultural Event October 24, 2026 · in 28 day(s)	4 confirmed · 1 unpaid · 6 cancelled	☒	☒	☒
Guru Purnima Celebration September, 2026 · skipped: needs a specific day · free event	0 confirmed	☒	☐	☒

Last activity 19/10/2026, 12:30:00 am: 0 reminder(s), 0 final, 5 cancelled, 0 welcome.

Figure 17 — Settings → Automatic Registration Emails, including the coupon part-payment and coupon-email settings and the per-event ticks.

- The master switches at the top turn each email type on or off for all ticked events.
- **Coupon part payment** switches the thank-you/balance email on or off. **minutes to wait** sets the delay (5-1440 minutes).
- **Email the coupon code & details...** switches coupon-creation emails on or off.
- In **Which events**, tick *Payment reminders*, *Auto-cancel unpaid* and *Welcome email* per event. Auto-cancel is off for new events until you tick it.
- **Preview what's due now** lists what would be sent without sending anything. **Run now** sends it immediately.

9. Data Management

9.1 Database Tables (Super Admin)

Figure 18 — Database Tables: view and edit any table directly.

Choose a table to view its rows. Use **Edit**, **Delete** and **+ Add row** to change records directly.

Use with care

Changes here bypass the normal checks and emails. Prefer the regular screens, and use this only to fix data that can't be corrected elsewhere.

9.2 File Management

Members Bank Events Settings Events Management **Data Management** Key Settings & Access

Database Tables **File Management**

Folders

Note: event flyer and pastmedia here are one-time seed data only — the live site serves flyers and past-event photos/videos from the database (via the Ticketing, Upcoming Events, and Past Events tabs), not from these files. Editing them here won't change what visitors see.

Database

Current connection

Connected

 postgresql://postgres:*****@localhost:5432/kutumb

Rotate / change connection string

Paste a new Neon (or any Postgres) connection string. It's tested against a throwaway connection first — nothing is saved unless the test succeeds, and the live app keeps using the current connection until you restart the server after saving.

New connection string

postgresql://user:password@host/db?sslmode=require

Test connectionSave to .env

Figure 20 — API Keys: database connection and payment/email/AI service keys.

Secret keys (Stripe, Square, PayPal, Groq, NAB feed and so on) are entered here and stored encrypted. Existing secrets are never displayed. Each secret box has an **eye icon** so you can check a new key before clicking **Save**. The database connection string is tested before it is saved, and takes effect after a server restart.

10.2 Settings

MembersBankEvents SettingsEvents ManagementData ManagementKey Settings & Access

API KeysSettingsAdmin UsersAudit Log

Payment Methods

Tick a payment method to offer it on the event registration success page. Untick it to hide that option from registrants immediately.

Payment Method	Enabled
Bank Transfer	☒
Pay by Card (Stripe)	☒
Pay by Card (Square)	☐
Pay by PayPal	☐

Payment Reconciliation

☒ Automatically reconcile pending payments for upcoming events (hourly check of bank credits; new NAB transactions pulled every 4 hours)

Automatic Registration Emails

☒ Payment reminders (twice weekly + final reminder) — on for ticked events
☒ Auto-cancel unpaid registrations — on for ticked events
☒ Day-before welcome email — on for ticked events

Figure 21 — Settings: Payment Methods, Payment Reconciliation and more.

Payment Methods — tick the methods offered to registrants: Bank Transfer, Card (Stripe), Card (Square), PayPal. **Payment Reconciliation** — automatic hourly matching of bank credits for upcoming events. **Automatic Registration Emails** — see section 8.

10.3 Admin Users

MembersBankEvents SettingsEvents ManagementData ManagementKey Settings & Access

API KeysSettingsAdmin UsersAudit Log

NameEmailPassword

RoleAdmin (limited access)

Add admin

Admin (limited access) can manage Events Settings, Events Management and File Management only — no access to Members, Database Tables, API Keys or Settings. Super Admin has full access to everything in this console.

Name	Email	Role	
Super Admin	info@kutumb.org.au	superadmin	Delete

Figure 22 — Admin Users: add an admin (with a password eye toggle) and manage existing logins.

Enter **Name**, **Email**, **Password** (use the eye icon to check it) and **Role**, then click **Add admin**. Use **Delete** to remove someone's access.

Figure 23 — Audit Log: who did what, and when.

Logins, coupon creation and emailing, edits, deletions and settings changes are recorded with the admin's email and the time.

11. Manuals

The **Manuals** tab is available to every admin. It holds this manual and the **Membership & Event Booking Guide**, which you can share with members.

Figure 24 — The Manuals tab.

- **Read here** shows the manual inside the console, below the cards.
- **Open in new tab** opens it in the browser's own PDF viewer. Use this on phones and tablets.
- **Download PDF** saves the file, for printing or emailing to members.

The PDFs are stored in the server's **data** folder under `manuals`. To publish an updated version, upload the new PDF **with the same file name** in **Data Management → File Management**, folder **manuals**. Any other PDF placed in that folder also appears in the tab.

12. Quick reference and troubleshooting

I want to...	Go to
Add or change an event, its fees or capacity	Events Settings → Upcoming Events
See who registered and who has paid	Events Management → Event Registration
Mark a payment received by hand	Event Registration → tick row → Modify Selected
Match bank transfers	Event Registration →  Upload Bank Statement (or automatic NAB feed)
Give someone a discount / free place	Events Management → Coupons (enter their email so it's sent to them)
Check people in at the door	Phone: kutumb.org.au/checkin · Desk: Events Management → QR Check-in
Turn reminders or auto-cancel on/off for an event	Key Settings & Access → Settings → Automatic Registration Emails → Which events
Add another admin	Key Settings & Access → Admin Users
Read, download or share a user manual	Manuals

Troubleshooting

Problem	What to check
Coupon "isn't valid for this event"	Coupons belong to one event and year. Check the coupon was generated for that exact event.
Coupon "already been used"	Coupons are single-use. Generate a new one if appropriate.
Coupon email not received	Check the Recipient Email, and the setting <i>Email the coupon code & details...</i> is ticked. Check SMTP under API Keys, then click  Email on the coupon to resend.
Bank transfer not matched	Ask for the date and amount, check that the reference included the registration number, then use Modify Selected to record it by hand.
No automatic reminders for an event	The event date must be a specific day, the master switch must be on, and the event must be ticked in <i>Which events</i> .
Phone check-in camera not starting	Allow camera permission for the site in the phone's browser settings and reload. The site must be opened over https.
